

PATRICIA MADETH BUNA

Butuan City, Philippines, 8601 • patriciamadeath@gmail.com • (+63) 906 462 3305

As a Computer Engineering student, I am proficient with my skills when it comes to Front-End Web Development using HTML, CSS, ReactJS and System Networking Administration. In hardware integration, I have also experienced IoT application using ESP32 and RFID tools. I am willing to learn, adapt to new challenges, and contribute to the company through real work experience.

EDUCATIONAL RECORD

Bachelor of Science in Computer Engineering

University of Mindanao, Davao City

Relevant Coursework: Computer Networks and Security, Microprocessor, Embedded Systems, Programming Logic and Design, Computer Drafting and Design

TECHNICAL SKILLS

Languages: C++, Python

Web: HTML, CSS, ASP.NET Core

Database: Firebase, SQL Server

Frameworks: ReactJS, Express.js

Tools: Git, GitHub, Visual Studio, VS Code

Hardware: ESP32, Arduino, RFID

Other: Networking and Administration, UI Web Programming (Front-End)

ACADEMIC PROJECTS

Accounting Receivable System (Academic Plate)

- Developed a system that records a customer's information.
- The system implements Add, Products, Update, Search and Display features.
- Java and SQL Server were mainly used in this project, programmed using Visual Studio.

Line-Following Robot (Collaborated Project)

- Built a simple line-following robot using BC 108 NPN Transistor, N4148Diode, and Resistor.
- The components were applied in a single PCB.

IoT Environmental Monitoring System (Co-Authored Thesis)

- Implemented an ESP32-based monitoring system using MQTT and sensors (RFID, DHT22).
- Contributed to integrate Firebase for automated database and real-time monitoring.
- Helped developed a web dashboard for visualization, mainly focusing on Front-End development.
